

Human Resource (HR) Accountability

HR HEALTH CHECK

Conduct a comprehensive review of your startup or existing HR requirements to identify key compliance requirements. Recognise potential gaps in reporting that may leave you open to Fair Work scrutiny.

CLOUD BASED HR PLATFORMS

HR teams can utilise the enableHR platform to develop and drive consistent HR and WHS processes across the organisation for each stage of the employee, contractor or volunteer lifecycle. By using the pre-populated platform, all actions are captured in centralised files, which enhances the accuracy of records, and meets recordkeeping and compliance requirements.

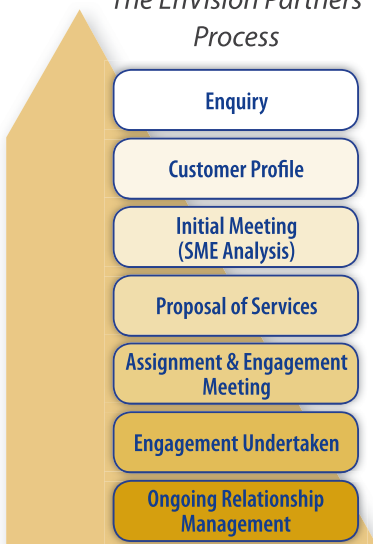

- ✓ Relieve pressures of HR tasks
- ✓ Drive consistent & compliant HR & WHS processes
- ✓ Minimise time spent on HR tasks

EnVision Partners' goal is to transform HR in any sized business from a transaction-oriented role to one where you work in partnership with managers, employees and other stakeholders to add value.

- Minimise the amount of time you spend on transactional tasks.
- Give more accountability to managers and employees, and provide them with the appropriate tools.
- Leverage technology and tools to transform your business.
- Cut the overall costs of HR management in your business.

As the HR manager or HR professional, you retain ownership and maintain control of HR processes, yet you're not swamped with transactional tasks. Instead, you can focus on developing strategic initiatives that create value for the business.
